DEPARTMENT OF PSYCHOLOGY
FACULTY OF EDUCATION

Conference Chair: Dr hab., prof. UR Andrzej Łukasik

INVITES YOU TO
THE INTERNATIONAL SCIENTIFIC CONFERENCE
MEN AND WOMEN. DIFFERENCES, SIMILARITIES.
RZESZÓW, POLAND (18-19 MAY 2016)

CONFERENCE AIMS AND OBJECTIVES

Due to social, cultural, and economic changes that have been taking place in recent decades in European countries, including Poland, gender issues have been introduced into the public discourse. The sex of man has become one of the most important social categories of great interest for scientists, politicians and ideologists, often leading to heated disputes.

A fundamental question has revived with great power: How does a woman differ from a man?, but also the reverse question appeared: How are women and men alike? On the one hand, these questions are the expression of human cognitive curiosity, the need to understand the surrounding reality, but on the other hand they have become a manifestation of the anxiety of people who feel that a significant order of the current world has been unbalanced.

Most importantly, contemporary answers which will probably still arise in the future, also have a practical dimension, for example shaping social policy. The aim of the Conference is to attempt to answer these two weighty questions from the position of science, particularly psychology.
The inaugural lecture entitled ‘Gender differences in empirical meta – analyzes’ will be delivered by Prof. dr hab. Bogdan Wojciszke

CONFERENCE CATEGORIES

1. Men and women - psychobiological perspective: the neurobiology of behavior associated with male and female sex, evolutionary determinants of behavior between men and women, the problems of ageing in men and women.

2. Gender in cultural perspective - the sociocultural determinants of gender, gender stereotypes and ideologies of gender roles, gender images in the media.

4. The differences and similarities between men and women in terms of cognitive, emotional and personality structure.

5. Mental health of men and women - ways of coping with stress and illness, patterns of mental disorders for men and women, the return to health, patterns of healthy behavior in terms of mental functioning, violence against a partner in the relationship, etc.

6. Men and women in education - methods of learning for men and women, adapting the educational needs resulting from the separation of gender, teaching models.

7. Men and women in the public sphere - politics, government, the situation of men and women in the labour market, professional activities, relationships between men and women in the workplace.
