

GEOTenerife

StopSciBullying

**WELCOME to the @StopSciBullying campaign led by GeoTenerife.
BIENVENIDOS(AS) a la campaña @StopSciBullying liderada por GeoTenerife.**

Over the last ten years, we have seen an increase in the number of informal reports we have been receiving from national and international students and colleagues we train and work with within the Canary Islands on scientific bullying of young scientists in the workplace. Academic bullying describes a range of behaviours that can have a heavy impact on young scientists at the start of their careers. We have joined up with the Academic Parity movement in the USA to research the issue and report back. Our first objective is to quantify the size of the problem and to build on the work they have already done in the USA to give an international perspective.
